

ANALYTICAL TEST REPORT

THESE RESULTS MEET NELAC STANDARDS

Submission Number : 25050350

City Of Winter Haven
4400 Pollard Rd
Winter Haven, FL 33884

Project Name : INDIAN RIVER EFFLUENT
Date Received : 05/07/2025
Time Received : 15:01

Frank O'neal

Submission Number:	25050350	Sample Date:	05/07/2025
Sample Number:	001	Sample Time:	08:25
Sample Description:	Indian River	Sample Method:	Composite

Parameter	Result	Units	MDL	PQL	Procedure	Analysis Date/Time	Analyst
TOTAL SUSPENDED SOLIDS	236	MG/L	0.570	2.280	SM2540D	05/08/2025 09:56	IR
BIOCHEMICAL OXYGEN DEMAND	98.6	MG/L	10	40	SM5210B	05/07/2025 20:46	LD/LD

Submission Number:	25050350	Sample Date:	05/07/2025
Sample Number:	002	Sample Time:	08:25
Sample Description:	Indian River	Sample Method:	Grab

Parameter	Result	Units	MDL	PQL	Procedure	Analysis Date/Time	Analyst
OIL & GREASE	30.7	MG/L	1.37	5.48	1664A	05/14/2025 09:44	CH

Date

Dr. Dale D. Dixon Laboratory Director

Haley Richardson QC Manager / Leah Lepore

QC Officer

DATA QUALIFIERS THAT MAY APPLY:

A = Value reported is an average of two or more determinations.
 B = Results based upon colony counts outside the ideal range.
 H = Value based on field kit determination. Results may not be accurate.
 I = Reported value is between the laboratory MDL and the PQL.
 J1 = Estimated value. Surrogate recovery limits exceeded.
 J2 = Estimated value. No quality control criteria exists for component.
 J3 = Estimated value. Quality control criteria for precision or accuracy not met.
 J4 = Estimated value. Sample matrix interference suspected.
 J5 = Estimated value. Data questionable due to improper lab or field protocols.
 K = Off-scale low. Value is known to be < the value reported.
 L = Off-scale high. Value is known to be > the value reported.
 N = Presumptive evidence of presence of material.
 O = Sampled, but analysis lost or not performed.
 Q = Sample held beyond accepted hold time.

T = Value reported is < MDL. Reported for informational purposes only and shall not be used in statistical analysis.

U = Analyte analyzed but not detected at the value indicated.

V = Analyte detected in sample and method blank. Results for this analyte in associated samples may be biased high. Standard, Duplicate and Spike values are within control limits. Reported data are usable.

Y = Analysis performed on an improperly preserved sample. Data may be inaccurate.

Z = Too many colonies were present (TNTC). The numeric value represents the filtration volume.

I = Data deviate from historically established concentration ranges.

? = Data rejected and should not be used. Some or all of QC data were outside criteria, and the presence or absence of the analyte cannot be determined from the data.

* = Not reported due to Interference.

Oil & Grease - If client does not send sufficient sample quantity for spike evaluation surface water samples are supplied by the laboratory.

NOTES:

MBAS calculated as LAS; molecular weight = 340.

PQL = 4xMDL.

ND = Not detected at or above the adjusted reporting limit.

G1 = Accuracy standard does not meet method control limits, but does meet lab control limits that are in agreement with USEPA generated data. USEPA letter available upon request.

G2 = Accuracy standard exceeds acceptable control limits. Duplicate and spike values are within control limits. Reported data are usable.

COMMENTS:

For questions or comments regarding these results, please contact us at (941) 723-9986.

Results relate only to the samples.

Chain of Custody Form:

Laboratory Submission #:

Station ID	Sample Type ¹	Sample Matrix ²	Collection		Quantity	Container Capacity	Type ³	Preservative ⁴	Parameters for Analysis	Laboratory Sample #
			Date	Time						
INDIAN RIVER	Comp.	WW	5/7/25	8:25 am	1	1 Qt	Plastic	Plain	BOD TSS	1
	Grab	WW			1	250mL	Amber Glass	1:4 H ₂ SO ₄ pH < 2	Oil & Grease	2

¹ "Sample Type" is used to indicate whether the sample was a grab (G) or whether it was a composite (C).

² "Sample Matrix" is used to indicate whether the sample is being discharged to drinking water (DW), groundwater (GW), surface water (SW), soil, sediment (SDMNT), or sludge (SLDG).

³ "Container Type" is used to indicate whether the container is plastic (P) or glass (G).

⁴ Sample must be refrigerated or stored in wet ice after collection. The temperature during storage should be less than or equal to 6°C (42.8°F).

⁵ Under "Preservative," list any preservatives that were added to the sample container.

Instructions:

- Each bottle has a label identifying sample ID, pre-measured preservative contained in the bottle, sample type, client ID, and parameters for analysis.
- The following information should be added to each bottle label after collection with permanent black ink: date and time of collection, sampler's name or initials, and any field number or ID.
- All bottles not containing preservative may be rinsed with appropriate sample prior to collection.
- The client is responsible for documentation of the sampling event. Please note special sampling events on the sample custody form.

Laboratory Sample Acceptability:
 pH < 2.0

BEA Temperature: 0.3°C
